Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The use of what appears to be a trademark, namely "BCM 300 Granite", has been noted in this application; but there is no trademark designation such as the "TM" superscript (for a common law trademark) or the "®." symbol (for a trademark registered with the Patent & Trademark Office). Clarification is required.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks. A trademark should be capitalized wherever it appears and be accompanied by the generic terminology.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Germantown *et al.* (U.S. # 5,886,302) in view of Swersey *et al.* (U.S. # 4,487,276), Hübler *et al.* (U.S. # 6,265,675 B1), and applicant's own admission of prior art. Germanton *et al.* discloses a platform as claimed and described (Fig. 5) made of

Art Unit: 2841

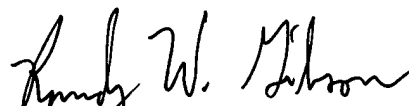

various conventional thermosetting materials (Col. 7, lines 47-65) with at least two load cells (Col. 3, lines 36-49), and a weight indicator (Col. 4, lines 27-61). Germanton *et al.* discloses the claimed invention except for the use of the specific fiber-filled polyester thermosetting polymer material. However, it is known in the weighing scale art to make a load bearing platform from a fiber re-enforced thermosetting polymer for strength as shown by the examples of Swersey *et al.* (Col. 4, lines 30-42) and Hübler *et al.* (Col. 6, lines 19-21). Furthermore, applicant has admitted that the fiber-filled polyester thermosetting polymer material he used is a conventional off-the-shelf material called "BCM 300 Granite", supplied by Bulk Molding Compounds (pp. 19-20), which has known properties; see *In re Nomiya*, 509 F.2d 566, 184 USPQ 607, 611 (CCPA 1975); and, MPEP § 2129. The examiner notes that the selection of a known material based on its suitability for its intended use supported a *prima facie* obviousness determination in *Sinclair & Carroll Co. v. Interchemical Corp.*, 325 U.S. 327, 65 USPQ 297 (1945) ("Reading a list and selecting a known compound to meet known requirements is no more ingenious than selecting the last piece to put in the last opening in a jig-saw puzzle." 325 U.S. at 335, 65 USPQ at 301.). Therefore it would have been obvious to the ordinary practitioner to use the specific type of material claimed to manufacture the platform of Germanton *et al.* based on the material's known suitability for its art recognized intended use. See MPEP §§ 2144.06 & 2144.07.
